

Science and Stem

★ Plastic Cup Tower

- Materials:
Plastic Cup
- Directions: Try to make the biggest and tallest tower using plastic cups! Let your child use their imagination to build!

★ Crawling Color Experiment

- Materials: 5 clear containers, food color, paper towels, and water
- Directions: Fill the clear containers with water and add some droplets of food coloring (red, yellow, and blue) into 3 containers. Line the containers: red, water, yellow, water, and blue. Add the paper towels to connect the containers together; one in the color going into the clear water and vice versa. Now wait until the colors crawl into the clear containers!
