

FROG ON A  
*Lily pad*

# FROG ON A *Lily pad*

Make a fun bouncy paper frog from coloured construction paper!

Use our template to cut frog and lily pad shapes, then make the frog bounce over the lily pad with a simple paper spring.

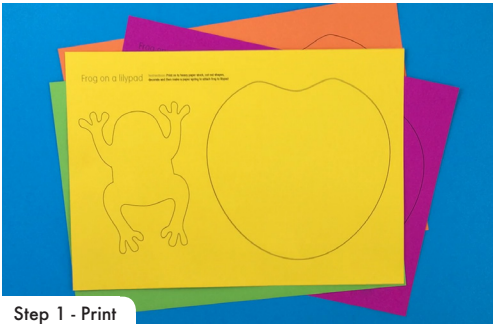

We have decorated our frogs and lily pads with dot stickers and construction paper in a different colour but please don't feel limited to that. You could use coloured markers, paints, pencils, crayons glitter glue etc. to decorate your creations.

## You will need

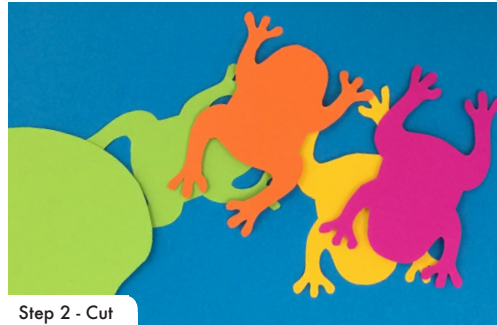

- Construction paper in assorted colours
- Scissors
- Glue stick
- Black felt tip pen
- Ruler
- Dot stickers (optional)

## How-To

- 1) Print the template directly onto your coloured construction paper. It's a good idea to print out two so that your frog is a different colour to your lily pad. Then you can make two frogs on lily pads.
- 2) Cut out the shapes.
- 3) Decorate the frog with dot stickers (or coloured markers if you have no dot stickers)
- 4) Decorate the lily pad. I've cut leaf details from a different coloured piece of construction paper.
- 5) Make a bouncy paper spring by sticking two paper strips at right angles to each other and folding over each other until it becomes a spring.
- 6) Stick the paper spring to the lily pad and stick the frog to the spring. Wallah! You now have a bouncy paper frog.

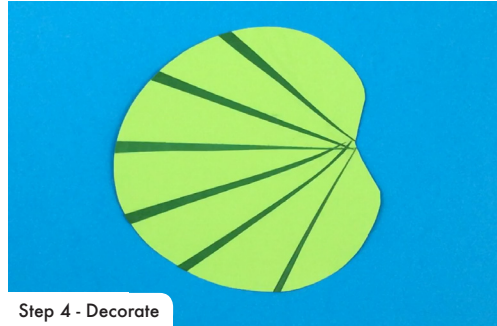

Step 1 - Print

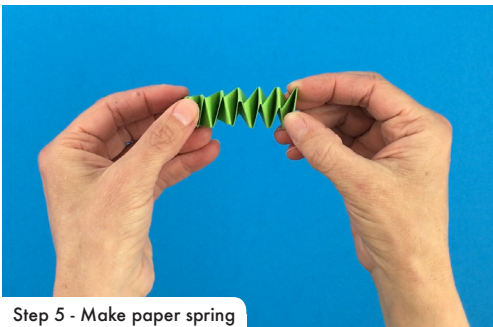

Step 2 - Cut

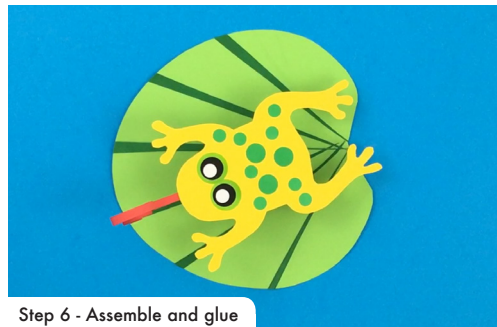

Step 3 - Decorate

Step 4 - Decorate

Step 5 - Make paper spring

Step 6 - Assemble and glue
